

Instructions for EMPI Type 2 Fuel Tank 95-2011-B

Hardware Supplied

Fuel Tank Outlet Pipe Kit	(1)
6mm Vent Tube Caps	(2)
8mm Vent Tube Cap	(1)
3 1/2" Nylon Ties	(2)
11" Nylon Tie	(1)

General Information

Due to the various configurations on this fuel tank between 1968 to 1972 we have provided all the necessary hardware to cap off any unnecessary vent or fuel outlet lines on your particular application. *If your vehicle is a 68-72 year model you cannot re-use your original fuel level sending unit. EMPI sending unit 98-9193-B (included) must be used.* Please refer to the proper shop manual for correct installation sequences and procedures.
