

Instructions for EMPI Type 2 Fuel Tank 95-2012-B

Hardware Supplied

Fuel Tank Outlet Pipe Kit	(1)
8mm Vent Tube Cap	(1)
11" Nylon Tie	(1)
Sending Unit	(1)

General Information

Due to the various configurations on this fuel tank between 1975 to 1979 we have provided all the necessary hardware to cap off any unnecessary vent or fuel outlet lines on your particular application. *Do Not Re-use your original fuel level sending unit. EMPI sending unit 98-9195-B (included) must be used to receive accurate fuel levels.* Please refer to the proper shop manual for correct installation sequences and procedures.
