

Windshield Bracket Kit Installation Instructions

1. This mount slides into the windshield channel so it is hidden from sight when mounted to the vehicle
2. Start by mocking up the windshield and getting it into a position you desire. Then mark where the mounts are going to sit.
3. Drill two $7/16$ " holes and space them $4\ 3/32$ " apart
4. Install the two mounts loosely on the body and slide the windshield down on the mounts and tighten the nuts under the dash.
